kavisudaniel@gmail.com

Dynamic Computer Science graduate with a solid academic foundation and 3 years of hands-on experience in software development. Proficient in Android native development, Java Spring Boot, and Flutter for building versatile cross-platform applications.

My academic journey has equipped me with a comprehensive understanding of computer science principles, while my practical experience has honed my skills in designing and developing innovative software solutions. I possess a proactive approach, enabling me to swiftly adapt to new technologies and industry trends, ensuring seamless integration with a company's preferred technology stack.

With a keen eye for continuous improvement, I am eager to further enhance my expertise in the Technology Field by immersing myself in challenging real-world projects. I am committed to leveraging my existing knowledge while embracing opportunities that foster professional growth and contribute meaningfully to cutting-edge software development initiatives.

EXPERIENCE

2021 – 2021

GOOGLE DEVELOPER STUDENT CLUB ANDROID TEAM LEADER, ST. PAUL'S UNIVERSITY

I managed to lead the coding team by

- Planning, organization and supervising the team.
- Introducing newbies to android development
- Code compilation.
- Building top user experience projects

2023-

RENDOFT SOLUTION,

INSURANCE BROKERAGE COMPANY, ATTACHEE

BACK-END DEVELOPER (SPRING BOOT), FLUTTER DEVELOPER

I actively participated in the development team, contributing significantly to integrating crucial functionalities into an established insurance brokerage application. My role involved collaborating on both backend using Spring Boot and frontend with Flutter, which substantially enhanced the application's capabilities and improved the user experience.

2022 – 2022

DUKE MOVERS STARTUP,

LOGISTICS COMPANY -

Successfully spearheaded the development of a map-integrated Android application for a logistics firm, showcasing expertise in end-to-end app creation from inception to deployment. Seamlessly integrated advanced mapping functionalities, enabling real-time tracking, route optimization, and geolocation features crucial for logistical operations. This initiative significantly improved operational efficiency, facilitating streamlined route planning and enhancing decision-making processes. The application's user-centric design and intuitive interface garnered positive feedback, resulting in improved customer satisfaction and optimized logistics management.

2022 – 2022

AFFECTO FOUNDATION,

PHILANTHROPY COMPANY -

Lead the development of a comprehensive application that revolutionized the management of sponsored children's academic progress and donation processes. I designed and implemented a secure platform enabling sponsors to track individual child profiles, monitor academic results, and receive real-time updates on educational milestones, fostering transparency and engagement. By integrating a seamless payment gateway, I facilitated secure fund transfers, empowering sponsors to make convenient one-time or recurring donations directly through the application. This initiative significantly improved communication channels between sponsors, the organization, and sponsored children's schools, enhancing operational efficiency and transparency in the philanthropic efforts.

EDUCATION

2018-2023

BACHELORS IN COMPUTER SCIENCE, ST. PAUL'S UNIVERSITY

Technical skills and course work

- Java, Kotlin , Spring Boot,Flutter
- Android Development,Back-End Development,Cross-Platform(Flutter)
- Database Management Systems: SQL, MongoDB, Firebase
- Operating Systems: Linux, Windows, macOS
- Computer Networks: TCP/IP, Network Security, Routing Protocols
- Data Structures and Algorithms: Algorithms Analysis, Problem Solving

2020-2020

SELF-TAUGHT DEVELOPER,

BACKEND DEVELOPMENT,ANDROID NATIVE,CROSS-PLATFORM(FLUTTER),

SKILLS

- Java - Proficient
- Android Native – Proficient
- Kotlin – Proficient
- Dart - Proficient
- Flutter -proficient
- XML and Jetpack Compose – Highly Proficient
- Spring Boot

PROJECTS

- **DUKE MOVERS** – is a mobile app designed for seamless logistics solutions, connecting customers with drivers for hassle-free moving assistance. This innovative platform simplifies the process of finding reliable help when needed for moving services. Users can swiftly connect with vetted drivers through the app, ensuring a smooth and efficient moving experience.

- **ROOMAR** - is an innovative application harnessing augmented reality (AR) to facilitate interactive learning experiences. It allows teachers to host Zoom-like meetings where they can share 3D models, fostering engaging lessons. This app empowers educators to create immersive environments for teaching while providing students with hands-on, visual learning opportunities through AR technology.
- **SCAPAY** – is an innovative app crafted to facilitate effortless customer-to-business payments via a scanning feature. This user-friendly application simplifies transactions by allowing users to easily pay businesses through scanning, streamlining the payment process. SCAPAY modernizes the payment experience, providing a convenient and secure platform for seamless financial interactions between customers and businesses.
- **ALGOBOT**- is a voice-activated assistant and chatbot application, similar to Google Assistant, designed for seamless integration into organizational online systems. It offers easy interaction and support, enhancing communication within organizations through its intuitive voice-driven features.
- **EABIRI** - is a user-friendly app enabling hassle-free bookings for long-distance matatus. Seamlessly integrating the M-Pesa Daraja API, users can reserve seats and securely pay using their M-Pesa accounts. It's a convenient, reliable, and efficient way to book travel, simplifying the entire process.
- **AFFECTO FOUNDATION** - mobile application was developed for a philanthropic company, providing a platform for individuals to easily support and directly send funds to the organization. This user-friendly app empowered individuals to contribute and make a positive impact by facilitating convenient and direct financial assistance to the AFFECTO FOUNDATION, fostering greater support for its philanthropic endeavors.
